

Journal Exam

Please write using complete sentences and answer the following questions below.

- Name two classmates that you competed with.
- What was the outcome of each of those races?
- How many races did you win or lose overall?
- Name five design or racing secrets that helped make your car fast.
- Why was your car faster or slower than your opponents and why?
- What would you change about your design?
- What aspect of your car are you most proud of?

My CO2 Dragster Journal:

* 2 class mates that I competed with was Courtney, and Rechel,

* Rechel - I won against

Courtney - I won

Brett - I won

Travis - I won

* My car was faster because of my axles and arrow dynamites.

* I would change anything but if I did I would put a hole in the middle to reduce my weight.

* I'm very proud of my car because I got 1st place out of the class.

* I managed I win all my races

* My car is very smooth, it has no ruff edges. (Sanded)

• I used graphite on my axle also WD-40, sanded my axle and also had pencil lead on my axle.

• only weighed 73 grams

• the arrow dynamites were good because the air blew right around it.

• Also I didn't apply a lot of paint due to the weight.

Specil thank-you to my brother that helped me, and the teachers,

Thank-You for being a Great teacher!
