To whom it may concern,

I believe John Berner to be a great candidate for a position in the Technology/Industrial Arts Education field. I have had the opportunity to have John in one of my information and communication technology-based courses here at UW-Stout and believe I have had ample opportunities to observe his development.

As my student, John demonstrated solid knowledge of various computer-based technologies that will be very affective in content deliverance, such as teaching various communication technologies with the use of Power Point presentations. He has a handle on web development, video, and picture editing and has the technical knowledge in these areas to teach the software and/or use the software to engage interests of his students.

John also has a humorous and creative personality. Through the work of team projects, he has been able to establish himself in the leadership role and work together as a team. His positive and reflective approach to perform at a higher level of achievement helps define the type of character he has grown into. With the teaching demonstrations that John has performed in my classes, it assures me that he has the knowledge and the determination to take new challenges.

John has excellent written and verbal communication skills, is reliable, and is extremely organized. He is not afraid to demand respectable behavior from his students and demonstrates a very positive attitude. I feel that he will make an excellent addition to your staff. If you have any further questions, with regard to his background or qualifications, please do not hesitate to contact me at (715) 232-5265.

Sincerely,

Evan Sveum
