

John M. Berner

Pre-Clinical Experience

I made contact with Mr. Gullickson at Colfax, Highschool on Oct. 4th, 2006 and arranged for an initial orientation to his technology education department the following day. Mr. Gullickson has one other pre-clinical student that meets with him every other day, so I agreed to come in on Tuesdays and Thursdays when he wasn't in. On Tuesdays, he gave me the opportunity to spend extra time working with a special education class that comes in to use his lab. I will be averaging about six to seven hours a week.
